ARCHES CONSTRUCTION

ARCHES CONSTRUCTION SOFTWARE STREAMLINES OPERATIONS FOR ANY CONSTRUCTION BUSINESS, MAKING IT EASY TO MANAGE SUBCONTRACTORS, SCHEDULES, BUDGETS, AND DEADLINES WITH AN INTUITIVE INTERFACE.

Streamline Every Phase of
Your Construction Project
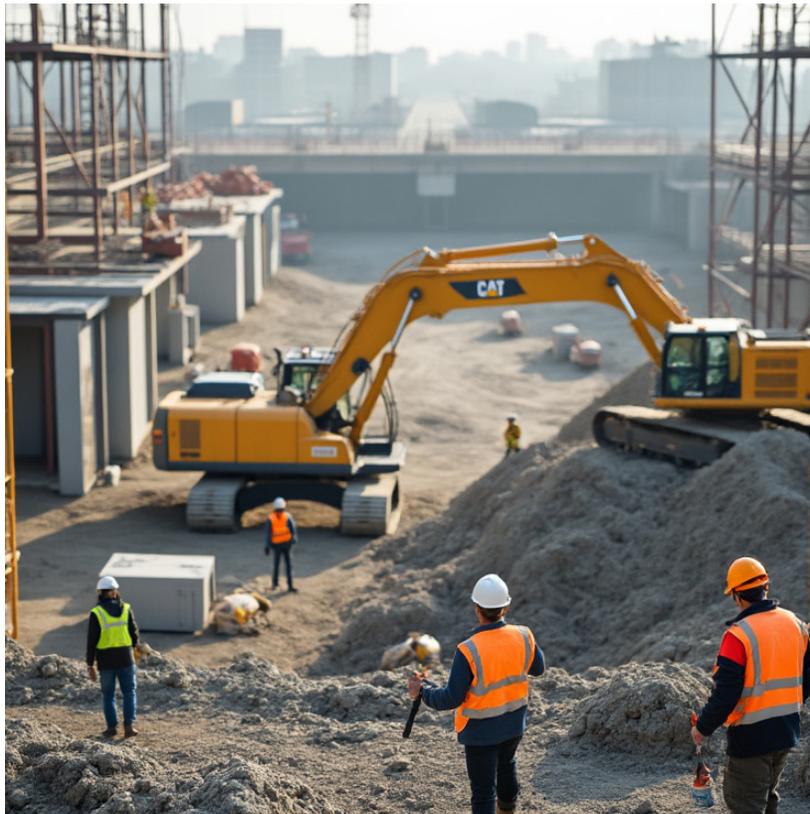

Arches Construction is an all-in-one construction management platform designed to streamline project planning, execution, and team collaboration. Built for flexibility, Arches adapts to the needs of contractors, project managers, and field teams, offering tools to manage timelines, resources, and documentation without the complexity of multiple disconnected apps.

ARCHES CONSTRUCTION | POWERED BY HEXAGON IT SOLUTIONS

Why Choose
Arches Construction?

Arches Construction distinguishes itself by offering a centralized, easy-to-use platform that integrates project planning, real-time reporting, team management, and financial tracking. Its flexibility and customization make it a standout choice for construction businesses that need both ease of use and advanced functionality.

Key Differentiators:

1. **Seamless Workflow Integration:** Unlike traditional platforms that may require multiple tools, Arches provides a complete project management suite, enabling teams to oversee all stages of construction from a single hub. This integration eliminates data silos and reduces the complexity of managing multiple applications.

2. **Tailored, Real-Time Reporting:** Arches offers real-time insights into project performance, with customizable dashboards that provide both high-level overviews and detailed analytics. With features like automated time tracking and job costing, teams gain visibility into resource allocation and costs, ensuring projects stay within budget.

3. **Efficient Collaboration and Communication:** Built to bridge field and office teams, Arches Construction includes tools like in-app messaging, digital forms, and document sharing, allowing seamless communication and reducing the need for time-consuming email exchanges. Arches ensures everyone stays connected, from the project manager to field workers.

4. **Scalability Across All Project Sizes:** Arches adapts to the needs of small, medium, and large-scale construction projects. With features like geofencing, custom automation workflows, and client portals, Arches caters to companies looking to scale their operations without investing in multiple platforms.

5. **Transparent, All-Inclusive Pricing:** Arches Construction is committed to simplicity in pricing. With a straightforward licensing model, users receive access to the entire suite of features under a single pricing tier, meaning no hidden fees or additional costs for extra modules or premium features. Unlike other platforms, Arches provides clarity from day one, so there are no surprises—just a predictable, inclusive fee that supports your business as it grows.

6. **Complete Solution–No Hidden Modules or Add-Ons:** Every feature, from project management to client communication and financial tracking, is included in the base subscription. This all-in-one approach ensures teams can leverage Arches' full capabilities without worrying about incremental charges for essential tools.

Core Features & Advantages of
Arches Construction

- **Unified Project and Task Management**

  Arches Construction centralizes project scheduling, task assignments, and progress tracking. Teams gain full visibility into project milestones, with features like automated updates, deadline reminders, and progress markers that ensure every project stays on schedule.

- **Automated Financial Tracking and Job Costing**

  Monitor and control project finances in real time with automated job costing, expense tracking, and payroll integration. Arches makes budgeting and cost projections simpler, keeping your projects financially on target.

- **Customizable Workflows and Process Automation**

  Easily create custom workflows that match your unique operational needs. Automate time-consuming tasks like form submissions, client approvals, and status updates to streamline operations and free up valuable team time.

- **Data Security and Compliance Built In**

  Arches employs high-level encryption and data protection features, ensuring that sensitive project data, financial records, and client information remain secure. This focus on compliance makes Arches suitable for industries with rigorous data security needs.

The Unique Value of Arches Construction

Arches Construction is crafted to provide the complete toolkit for managing every project phase without the complexity of separate tools or fluctuating fees. Its transparent pricing, robust feature set, and industry adaptability make it a powerful choice for construction teams aiming to simplify processes, enhance team collaboration, and maintain clear financial oversight. Arches adapts with your company, allowing you to add users or features as needed without the surprise of additional costs.

The Arches Advantage:
Built for Scalability & Simplicity

1. **No Surprise Costs:** With Arches, users receive access to every feature in one unified package. The all-inclusive fee structure ensures peace of mind and financial predictability.

2. **Fully Customizable for Unique Needs:** Arches adapts to fit your business. Customize dashboards, automate workflows, and tailor permissions to support your team's exact processes.

3. **Designed for Every Team Member:** From project managers to field teams, Arches enables each role to collaborate efficiently, improving team alignment and ensuring everyone stays informed.

4. **Global Scalability:** Whether your business operates locally or across regions, Arches is built to scale, offering multi-language support, region-specific data handling, and adaptable workflows to support growth.

5. **Single-Platform Solution:** Arches eliminates the need for additional software, simplifying workflows and reducing IT overhead. With a comprehensive toolkit for project management, communication, and finances, it's the only solution your team needs.
